Dr. Phil Berger
597 Parliament St. #208
Toronto.

Dear Dr Berger!

Further to our conversation yesterday (Nov 26th) this note is to confirm our intention (Bob, Dave, Steve Fullerton Allelix) to hold a small symposium on HIV-causality and HIV/Syphilis inter-reaction, and to canvas the Primary Care Physicians group for interest in attending (at no charge).

This is very preliminary and date will depend on the availability of Peter Duesberg and Sheila Lukehart, whom we have invited and indicated late Jan or early Feb But these dates may be too early.

We are seeking Dr. Lukehart's advice because she has expertise in CMI in Syphilis far beyond ours.

In addition, if there is interest in general exploration of all these arguments, I would be very pleased to review all the literature and papers I have accumulated with any interested physician (takes a few hours to scratch the surface). Bob Lee also indicated a willingness to help in any session or forum if there is interest.

John.
